

Feature

Benefit

- **All-in-one** design.
 - **Zero footprint** of thin client.
 - Overall power consumption of only **25W**, including LCD, thin client, monitor and keyboard
 - Very high **reliability** power supply, made in India, for India.
 - Superb **mechanical stability**
 - **Dust proof** design
 - Extreme thermal operating range of **0 to 50°C**
 - Only 25W heat generation
 - High humidity range
 - **24x7x365** reliability
- Aesthetic looks – no wires, no mess.
 - Saves space. Conserves precious real estate.
 - Can be wall mounted, eliminating need for furniture – zero footprint.
 - Quick installation, simpler maintenance.
 - Users cannot fiddle with cabling – prevent failures and downtime.
 - Save Rs. 1,500 every year in power, compared to PCs.
 - Can run all day from a low cost solar power system.
 - Does not need UPS. Can run from home inverter. Twenty units can run for four hours from a single home inverter.
 - 85% reduction in UPS and generator sizing, compared to PCs.
 - Reliable design with no moving parts. Completely fanless design.
 - Can be mounted in moving vehicles and on factory floors.
 - Can handle low intensity drops.
 - Run anywhere in India, without worrying about dust and heat.
 - Runs outdoors, under a shade.
 - Highest temperature range of any IT product in the market.
 - Product generates less heat, leading to longer life.
 - Does not need air conditioning to run.
 - Works in any coastal environment
 - Use in mission critical applications like instrumentation.
 - Use in always-on digital signage.
