Meet the Aero Mini PC: powerhouse performance in a quietly confident little package.

This is the desktop that asks “where do you want me?” and then simply gets on with it. Whether it is perched behind a reception desk, tucked under a till, or clipped discreetly to the back of a screen, the Aero brings serious Intel Core Ultra 5 muscle to any workspace that values clean lines and uncluttered counters.

Why you’ll want one

- It handles the busy stuff without breaking a sweat — from digital signage and point-of-sale to back-office admin, patient check-in kiosks and classroom presentations.
- Twin Gigabit Ethernet ports make it a natural fit for firewall, gateway and network appliance roles, or for securely linking two separate networks at once.

- Plenty of USB ports, plus HDMI and VGA outputs, mean you can hook up legacy screens and modern peripherals side by side — no adapter spaghetti required.
- Its powder-coated steel and ABS body shrugs off the knocks and bumps of daily life, keeping things looking professional long after installation day.
- With Windows 11 Professional preinstalled, and a matching Thinvent keyboard and mouse in the box, it is ready to run from the moment you plug it in.

From shop floors to surgeries, hotel lobbies to logistics offices, the Aero is the reliable, space-saving workhorse that keeps your team moving. It is quiet, it is tidy, and it is endlessly capable.

Choose the Aero Mini PC when you want big-desktop dependability without the bulky tower underneath your desk. Your floor space will thank you — and so will your IT manager.
