## Power without the footprint

Harness the performance of a 12th Gen Intel Core i5 processor in a chassis barely larger than a hardback book. The Thinvent Aero Mini PC delivers desktop-grade computing for space-constrained environments – think retail kiosks, digital signage, factory-floor control panels, or busy reception desks. You get smooth multitasking and rapid boot times, so your applications run without lag, and your team stays productive.

### Ready to work from the moment you open the box

- Complete with Thinvent keyboard and mouse, plus Windows 11 IoT Enterprise – no assembly, no separate OS purchase, just plug in and go
- Dual-band Wi-Fi and Gigabit Ethernet give you flexible networking for cloud-connected operations or isolated local networks

- Compact steel housing with a tough powder-coated finish stands up to knocks and dust in light industrial or high-traffic public spaces

### Built for the long haul, not the landfill

- RoHS and ISO certified, ensuring responsible manufacturing and reliable operation in temperatures from 0°C to 35°C
- 12V DC power keeps energy consumption low, perfect for always-on applications like wayfinding terminals or back-office workstations
- Multiple USB ports and a USB-C front connection make it simple to attach a barcode scanner, receipt printer, or touchscreen without extra hubs

Why choose Thinvent? Because we design for real-world scenarios where space, reliability, and immediate usability matter. The Aero Mini PC gives you enterprise-grade power in a footprint that fits anywhere – and it's ready to deliver, day in, day out.
