Quiet power, visible value: the Thinvent Aero Mini PC brings desktop-level performance to any space.

Why settle for bulky hardware when you can get all the work done from a system that fits in the palm of your hand? With a solid Intel i5 12th-gen processor driving eight efficient cores, this mini PC is built to breeze through everyday tasks — from running office suites and browsing the web to handling remote desktop sessions and controlling public-facing information kiosks.

- Keep your desk clutter-free and your workflow uninterrupted, as it effortlessly takes on email, document editing, and multimedia playback with no fuss.
- Save on energy costs thanks to its power-sipping 12 volt design; it's built to stay on for long hours in reception areas, libraries, or factory floors.
- Enjoy a fearless browsing experience with Chromium and Mozilla Firefox out of the box, ready for in-store catalogues, intranet portals, or customer touchpoints.

- Rely on safe remote access through built-in RDP, SSH, and VNC programs, making it ideal for point-of-sale terminals, thin client deployments, or school labs.
- Include pre-installed productivity tools like LibreOffice and a PDF viewer so your team can start using it the moment it's fresh from the box.
- Integrate smoothly with network-management software; web-based remote management helps IT keep every unit running without needing to walk from desk to desk.

Skip installation headaches. Power on, log in, and be productive immediately. Entire systems are assembled and tested by Thinvent, backed by Indian BIS conformity certification and a full keyboard-and-mouse set.

Choose simplicity without compromise with the Aero Mini PC from Thinvent. It does everything you need, nothing you don't.
