Power without the footprint

Harness the performance of a 12th Gen Intel Core i5 processor in a chassis barely larger than a hardback book. The Thinvent Aero Mini PC delivers desktop-grade computing for space-constrained environments – think retail kiosks, digital signage, factory-floor control panels, or busy reception desks. You get smooth multitasking and rapid boot times, so your applications run without lag, and your team stays productive.

Ready to work from the moment you open the box

- Complete with Thinvent keyboard and mouse, plus Windows 11 IoT Enterprise – no assembly, no separate OS purchase, just plug in and go
- Dual-band Wi-Fi and Gigabit Ethernet give you flexible networking for cloud-connected operations or isolated local networks

- Compact steel housing with a tough powder-coated finish stands up to knocks and dust in light industrial or high-traffic public spaces

Built for the long haul, not the landfill

- RoHS and ISO certified, ensuring responsible manufacturing and reliable operation in temperatures from 0°C to 35°C
- 12V DC power keeps energy consumption low, perfect for always-on applications like wayfinding terminals or back-office workstations
- Multiple USB ports and a USB-C front connection make it simple to attach a barcode scanner, receipt printer, or touchscreen without extra hubs

Why choose Thinvent? Because we design for real-world scenarios where space, reliability, and immediate usability matter. The Aero Mini PC gives you enterprise-grade power in a footprint that fits anywhere – and it's ready to deliver, day in, day out.
