Powerful performance in a pocket-sized package.

Designed to fit seamlessly into any workspace, the Thinvent Aero Mini PC delivers the raw processing power you need without taking up valuable desk real estate. At its heart lies an AMD Ryzen 5 7430U processor with six high-performance cores, capable of handling everything from demanding business applications to smooth 4K media playback. Whether you're running a busy office, setting up a digital signage network, or building a compact home entertainment system, this mini PC is built to keep up.

Flexibility is key. With no operating system pre-installed, you have complete freedom to choose the software that suits your workflow - whether that's Windows, Linux, or a specialised embedded OS. The inclusion of both HDMI and VGA outputs means you can connect to modern monitors and older projectors alike, making it ideal for conference rooms or mixed-generational hardware setups.

Connectivity is generous for such a small unit. Dual-band Wi-Fi ensures reliable wireless networking, while Gigabit Ethernet provides a stable wired option for critical tasks. Multiple USB ports - including a USB-C port - make it easy to attach peripherals, storage drives, or input devices without needing a hub.

Quiet, efficient, and robust, the Aero Mini PC is finished in a durable powder-coated steel chassis. It draws power from a compact 12V adapter, keeping energy consumption low even under load. Whether you're outfitting a hot-desk environment or creating a dedicated workstation, this is the reliable, space-saving workhorse you've been looking for.
