Powerful performance, perfectly compact.

The new Thinvent Aero Mini PC brings genuine desktop-class performance to the smallest of footprints. Powered by an AMD Ryzen™ 5 processor, it handles demanding multitasking, data entry, and industrial software with effortless ease – all without taking up precious desk space.

Why choose the Aero for your workspace? It is engineered for reliability in busy environments. The robust steel and ABS housing, finished with a durable powder coat, withstands the bumps and knocks of daily use, making it ideal for factory floors, retail counters, or busy offices.

This mini PC is a smart upgrade for anyone running legacy systems or looking to modernise a workstation. It runs Windows 11 Pro out of the box, so integration into your existing network is straightforward. With multiple USB ports – including a convenient USB-C on the front – and both HDMI and VGA outputs, you can connect legacy monitors, barcode scanners, printers, or other peripherals without hassle.

The Aero Mini PC is also a champion of space-saving. Tuck it behind a monitor, mount it under a desk, or place it in a tight kiosk enclosure. Its low power draw from the included 12V adapter keeps energy costs down and heat output minimal.

For a compact computer that delivers reliable performance, easy connectivity, and the ruggedness your work demands, the Thinvent Aero is the practical, powerful choice.
