Power your industrial operations with uncompromising reliability.

The Thinvent Neo H Mini PC is the high-performance flagship of our bestselling Neo series, engineered to handle the toughest industrial control and automation tasks. This is not a compromise – it is a workhorse built to run continuously in challenging environments, from factory floors to embedded systems.

Every unit is 100% designed and made in India using a solid steel chassis that shrugs off vibration, dust, and physical knocks. Inside, the powerful 12th generation Core i5 processor delivers the raw compute muscle your demanding applications need, without wasteful energy spikes. Meanwhile, the generous connectivity options – including dual USB 3.2 ports and dual video outputs – let you connect legacy equipment alongside modern displays, all without expensive adapters.

We know reliability is non-negotiable in industrial settings. That is why the Neo H runs on a stable 12V DC supply, perfect for 24/7 operation, and why we equip it with a wired Ethernet port rather than fickle wireless. The included Thinvent keyboard and mouse get you started from the moment it arrives, and the bare-metal OS approach means you can load exactly the environment you need – whether that is a lightweight Linux, a custom embedded OS, or a full Windows installation.

Choose the Thinvent Neo H when uptime matters, when a standard desktop simply will not do, and when you need a mini PC that works as hard as you do.
