Power meets resilience for the toughest industrial environments.

Unleash Industrial Performance

The Neo H is the high-performance flagship of our bestselling Neo series, engineered to be the workhorse of your factory floor. Whether you are running complex control systems, managing data acquisition, or powering automation tasks, its potent processor and generous memory handle multiple demanding applications with effortless speed. No lag, no stalling – just reliable, consistent output that keeps your operations moving.

Built for the Real World

This is not a fragile office machine. Housed in a robust, powder-coated steel chassis, the Neo H shrugs off the knocks, vibrations, and dust that plague industrial settings. It operates reliably in temperatures from freezing to 40°C, ensuring your critical processes stay online even when conditions get tough. It's a computer designed to be mounted, cabled up, and forgotten – in the best possible way.

Effortless Connectivity and Control

Connect practically anything. With multiple USB 3.2 and USB 2.0 ports, HDMI and VGA outputs, Gigabit Ethernet, and dual-band Wi-Fi, integrating the Neo H into your existing network and peripherals is simple. The included Thinux Embedded Linux comes pre-loaded with remote management tools – RDP, VNC, SSH – so you can monitor and control your equipment from anywhere on site. Plus, a full keyboard and mouse set means you are ready to work straight out of the box.

Made in India, Made to Last

One hundred percent designed and manufactured in India, the Neo H meets strict quality standards (BIS, RoHS, ISO). By choosing Thinvent, you are investing in proven local engineering, fast support, and a product built for years of dependable service. For industrial control and automation where failure is not an option, the Neo H is the professional's choice.
