When reliability meets raw power – the Thinvent Neo H Mini PC is your industrial workhorse.

Why the Neo H stands apart

- This is the high-performance flagship of our acclaimed Neo range, built for tasks that demand more from a compact system
- Powered by a robust 12th-generation Intel Core i5 processor with eight cores, it handles compute-intensive applications without breaking a sweat
- Generous connectivity – multiple USB ports, HDMI, VGA, gigabit Ethernet – means you can hook up legacy machinery and modern peripherals with ease
- Its solid steel chassis and powder-coated finish are engineered to withstand the bumps and knocks of a factory floor or control cabinet

Benefits for your operation

- Streamline industrial control, data acquisition, or edge computing without the bulk or noise of a traditional tower
- Run multiple monitoring or automation tasks simultaneously thanks to the capable processor and expandable memory

- Eliminate downtime – the Neo H runs reliably in ambient temperatures up to 40°C and non-condensing humidity, so it keeps working when conditions get tough

Ready for demanding environments

- Designed and manufactured entirely in India, giving you assured supply chain and local support
- The included 12V DC adapter ensures stable power delivery, while the 2-metre cable offers flexible placement
- Delivered with FreeDOS – you choose the operating system that fits your existing infrastructure, saving on licensing costs

Choose the Neo H for peace of mind

- Its steel construction and powder-coated exterior resist corrosion and minor impacts, protecting your investment
- With certification to BIS, RoHS and ISO standards, you can trust it meets rigorous quality and safety benchmarks
- A compact and lightweight footprint – just 1.73 kg – makes installation in tight spaces or on mobile carts straightforward
