The powerhouse your industrial operation has been waiting for.

Built for the toughest shifts and the most demanding control systems, the Thinvent Neo H Mini PC brings workstation-class performance to the factory floor. As the high-performance evolution of our bestselling Neo series, it is our largest and most capable model — a genuine industrial workhorse that handles complex automation, real-time data processing, and multi-tasking without breaking a sweat.

Why choose the Neo H for your next deployment

- Uncompromising performance for industrial control: the powerful 12th-generation processor and generous memory configuration let you run SCADA, HMI, and edge computing applications with seamless responsiveness.
- A connectivity hub at your fingertips: with multiple USB ports, full Gigabit Ethernet, and both HDMI and VGA outputs, you can connect to legacy machinery, modern displays, and peripheral devices without adapters — keeping your integration simple and your costs low.

- Built to last in demanding environments: housed in a solid steel, powder-coated chassis, this Mini PC is designed to resist vibration, dust, and the knocks of daily industrial life. It operates reliably in temperatures from 0°C to 40°C, so it's ready for the workshop, warehouse, or control cabinet.
- 100% designed and made in India: every Neo H is engineered and manufactured right here, ensuring fast support, local compliance, and a supply chain you can trust. Certification to BIS, RoHS, and ISO standards means it meets the quality benchmarks your projects demand.
- Ready to run from the box: pre-loaded with Windows 11 IoT Enterprise LTSC 2024 Value, it delivers a stable, long-term platform for your software stack — no additional setup headaches.

Whether you're replacing an ageing panel PC or building a new production line, the Neo H gives you the performance, durability, and connectivity your factory needs. It's simply the right tool for the job.
