Power through industrial workloads, made in India.

Meet the Thinvent® Neo H Mini PC, the high performance version of our bestselling Neo model. It pairs a 12th generation Intel® Core™ i5-1235U processor with a steel, powder coated chassis built for the shop floor, so your industrial control applications keep moving without drama.

Why it earns its place on your desk

- Serious processing headroom. Ten cores reaching up to 4.4 GHz keep demanding control software, dashboards and multi-tasking running smoothly.
- Connect everything at once. Dual Gigabit Ethernet, six COM ports and an RS485 option make it a natural fit for industrial control, automation and equipment integration.

- Room for your peripherals. HDMI and VGA for displays, USB 3.2 for fast devices, plus speaker out and mic in for operator stations.
- Ready the moment it arrives. Windows 11 Professional, a keyboard and mouse set, and a 12V adapter are all in the box, so you can deploy rather than configure.
- Built to last. A solid steel housing and 100% designed and made in India, backed by BIS, RoHS and ISO certifications.

If you need one compact machine to anchor an industrial control setup, the Neo H Mini PC is the workhorse to choose.
