Power Through Demanding Industrial Work with the Neo H Mini PC

Meet the High Performance version of our bestselling Neo range, built as an industrial workhorse for control rooms, automation cells and demanding embedded tasks.

Fast and capable, the Neo H is powered by a 14th generation Intel® Core™ i5-14400 processor with 10 cores, reaching up to 4.7 GHz, so it stays quick to respond when your applications need it most. Generous 4GB DDR4 memory and 128GB of SSD storage keep your operations running smoothly.

Designed for real industrial life, its steel base and aluminium cover, finished in durable black powder coating, give the Neo H a solid, professional look and feel. Reliable 0°C to 40°C operation and tolerance for 20% to 80% humidity, non-condensing, mean it's ready for the environments where you actually work.

Connectivity is where the Neo H truly shines. You get two HDMI ports, a DisplayPort, Gigabit Ethernet, two USB 3.2 Gen 2 and two USB 3.2 Gen 1 ports, plus audio input and output for flexible integration with your equipment.

Ready to work out of the box, Thinux™ Embedded Linux comes with Chromium and Mozilla Firefox browsers, LibreOffice, a PDF viewer and multimedia playback with MPEG4 support. Remote management is simple thanks to RDP 10, SSH, PuTTY, browser-based management and VNC shadowing, while Java, Python and glibc-based application support let your own software run with ease. SIP video and voice over IP are also included.

Proudly 100% designed and made in India, the Neo H Mini PC is the high-performance choice for industrial control and similar applications.

Choose the Neo H Mini PC and give your operations the power they deserve.
