Power Through Every Process: The Neo H Mini PC Built for Industrial Demands

Meet the High Performance version of the bestselling Neo range, the most powerful machine in the family and built to handle serious industrial workloads with confidence.

At its heart sits the Intel® Core™ i7-14700 processor, a 14th generation powerhouse that gives you the muscle to run demanding control applications, process data quickly and keep operations moving without hesitation. Whether you are managing a production line, running supervisory software or handling complex automation tasks, this mini PC responds fast and keeps working.

Connectivity is where the Neo H truly shines. With two HDMI outputs, a DisplayPort, multiple USB 3.2 Gen 2 and Gen 1 ports, and gigabit Ethernet, it links easily with the screens, peripherals and networks your operation relies on.

Built for the factory floor, the Neo H features a steel base and an aluminium cover finished in durable black powder coating. It is designed to stand up to the rigours of daily industrial use and stays reliable in environments where lesser machines would struggle.

Thinux™ Embedded Linux comes pre-installed, bringing a stable and familiar platform with browser-based remote management, VNC shadowing and RDP support. Java, Python and glibc-based applications run smoothly, so you can deploy your existing software with ease.

Proudly designed and made in India, the Neo H Mini PC is the workhorse your industrial applications have been waiting for. Choose the machine that performs as hard as your business does.
