Power Through Industrial Workloads with the Thinvent Neo H Mini PC

Built for demanding industrial environments, the Thinvent® Neo H Mini PC brings high-performance computing into a compact, robust package. As the High Performance version of our bestselling Neo range, it is our largest and most powerful model, designed for operators who need serious processing muscle without compromise.

At its heart sits the Intel® Core™ i7-14700 processor, offering 20 cores that stay quick to respond under sustained load. Whether you are running industrial control software, monitoring multiple processes or handling data-intensive applications, this 14th generation processor keeps your operations moving.

Connectivity is where the Neo H excels. With two HDMI outputs and a DisplayPort, you can drive multiple screens for control rooms and monitoring stations. Two USB 3.2 Gen 2 and two USB 3.2 Gen 1 ports let you connect peripherals and data devices with ease, while Gigabit Ethernet and dual band Wi-Fi keep you linked to your network however your site is set up.

Security is built in, with a TPM 2.0 header supporting your protection requirements. Pre-installed with Microsoft Windows 11 Pro, the Neo H is ready to deploy straight out of the box.

Its steel base and aluminium cover, finished in durable powder-coated black, give the Neo H a tough, professional look that suits factory floors and control cabinets alike. The Intel® Laminar boxed cooler keeps the processor running steadily as temperatures rise.

Proudly 100% designed and made in India, the Neo H Mini PC is the dependable choice for industrial control and similar applications where performance and reliability matter most.
