Power Your Industrial Work With the Neo H Mini PC

Compact enough to fit where full-size workstations cannot, yet built to handle demanding industrial workloads, the Thinvent Neo H Mini PC brings desktop-class performance to the factory floor, control room and beyond.

At its heart sits the Intel Core i7-14700 processor, with 20 cores and a 33 MB cache. Whether you are running control software, processing data or managing several tasks at once, the Neo H responds quickly and keeps your operations moving.

The Neo H is the High Performance version of our bestselling Neo model and is our largest product in the range. It is an industrial workhorse, designed for industrial control and similar applications where reliability and responsiveness matter most.

Connectivity is generous. Two HDMI ports and a DisplayPort let you drive multiple screens, while two USB 3.2 Gen 2 and two USB 3.2 Gen 1 ports connect your peripherals and equipment. A 1000 Mbps Ethernet port keeps your network connection fast, and audio and microphone jacks support voice and sound-based tasks.

Built to be tough, the Neo H features a steel base and an aluminium cover with a durable black powder-coated finish, giving it a solid, professional look and feel. It operates across a temperature range of 0°C to 40°C and a humidity range of 20% to 80% RH, non-condensing, so it is ready for everyday industrial environments.

Proudly 100% designed and made in India, the Neo H is a dependable choice for businesses that value quality and local manufacturing. Choose the Thinvent Neo H Mini PC and give your industrial operations the performance they deserve.
