Unleash industrial-grade power in a compact, battle-ready chassis.

Built for the toughest jobs, not the desktop

The Thinvent Neo H Mini PC is the high-performance flagship of our bestselling Neo series, engineered to handle relentless industrial control, automation, and edge computing tasks. This is no ordinary mini computer – it's a purpose-built workhorse that thrives on the factory floor, in control cabinets, and at critical data collection points.

Why settle for less? The Neo H combines a powerful 6-core AMD Ryzen 5 processor with a robust complement of memory and storage to run demanding HMI software, data logging, and machine monitoring without breaking a sweat. With a solid, powder-coated steel housing and a wide operating temperature range, it shrugs off vibration, dust, and heat that would sideline a consumer PC.

Connectivity is king here. You get dual Ethernet, multiple USB ports, plus HDMI and VGA outputs to drive legacy and modern displays simultaneously. Whether you're replacing an old panel PC or building a new SCADA station, the Neo H slots right in – no adapters, no fuss.

Every unit is 100% designed and made in India, built to industrial standards with BIS, RoHS, and ISO certifications. It's the kind of reliability you can count on for years of continuous operation, backed by Thinvent's commitment to quality and local support.

Don't spec a fragile consumer machine where only an industrial mini PC will do. Choose the Neo H – the rugged, powerful heart of your next automation project.
