Built for the toughest jobs, the Neo H Mini PC elevates your control room.

Industrial control demands a machine that never flinches. The Neo H brings serious processing power and generous memory to your most demanding applications, from factory floor automation to data acquisition systems. Its solid steel chassis is built to withstand the rigours of a hard-working environment, while a comprehensive selection of ports ensures you can connect to legacy and modern equipment without compromise.

Why choose the Neo H for your next project?

- Unleash true multitasking: run complex control software, monitor multiple processes, and handle data logging simultaneously, all without a hint of lag.
- Effortless integration: with a VGA port alongside HDMI, you can easily connect to older monitors and projectors, keeping existing infrastructure in play.

- Reliable connectivity: dual-band WiFi and gigabit Ethernet give you flexible networking options, ensuring your machine stays online and responsive.
- Energy-efficient and compact: consumes minimal power and takes up very little space on your workbench or in a DIN-rail cabinet.
- Designed and manufactured in India: built to the highest quality standards with a powder-coated steel finish, this PC is engineered for longevity.

The Neo H is more than a computer; it's a reliable partner for your most critical operations. Whether you're upgrading a production line or building a new control system, choose the workhorse that delivers day in, day out.
