The industrial workhorse that keeps your operation moving.

The Thinvent Neo H Mini PC brings serious AMD Ryzen 5 performance to the heart of your business. Built for industrial control and similar demanding applications, it handles the workloads that keep production lines, monitoring stations and back-office systems running smoothly all day.

Why choose the Neo H

- Powerful processing for real work. The AMD Ryzen 5 7530U with six cores responds quickly to multitasking, data logging and control software, so your team spends less time waiting and more time producing.
- Ready for your equipment. With HDMI, VGA, dual USB 3.2 Gen 1 and USB 2.0 ports, speaker out and mic in, plus Gigabit Ethernet and dual band Wi-Fi, it connects to the displays, peripherals and networks you already use.
- Built to last on the factory floor. The solid steel housing with a powder coated black finish stands up to the knocks and dust of an industrial environment, while the wide 100 to 240 volt power input copes with unstable mains supply.
- Compact where space matters. Its mini PC form factor fits into control cabinets and tight workstations without crowding out the equipment around it.
- Proudly made in India. Designed and manufactured here, backed by BIS, RoHS and ISO certifications, with the support of a brand that understands industrial buyers.

If you need a dependable, powerful and locally built computer for industrial control, the Thinvent Neo H is the one to specify.
