### Engineered for Endurance

Born for the demanding environments where others falter. This fanless, rugged industrial PC thrives in the heat, dust, and constant vibration of the factory floor, delivering unwavering 24/7 operation without the point of failure that moving parts represent. Its robust aluminium chassis, with a sleek anodised finish, is 100% designed and built in India to withstand the challenges of modern industry and IoT deployments.

### Power Where It Counts

Harness efficient, modern processing power to drive your critical applications smoothly. From machine control and process monitoring to digital signage and interactive kiosks, the IPC3 handles it with consistent, reliable performance. Its fanless thermal design ensures silent running and prevents dust ingress, making it the perfect, maintenance-averse brain for your automated systems.

### Seamless Industrial Connectivity

Integrate effortlessly with legacy machinery and modern networks. With multiple serial ports and dual Gigabit LAN, this unit is a true bridge between old and new industrial ecosystems, allowing you to gather data and control equipment without compromise. Manage everything with ease through its powerful, integrated remote management tools.
