Power where it matters, built to keep British industry moving.

Rugged by design

- Fanless, passive cooling means no moving parts to fail, no dust to clog, and no noise in the quietest of workshops.
- A tough, anodised aluminium housing shrugs off knocks, vibrations, and the daily grind of factory life.
- Operates reliably in demanding temperatures, so your line never stops, even when the heat is on.

Connectivity that keeps pace

- Twin Gigabit Ethernet ports let you link machines, PLCs, and controllers without breaking a sweat.
- Dual-band Wi-Fi gives you flexible deployment, whether you're cabling up or going wireless.
- A generous spread of USB, serial, and audio ports means the IPC5 plays nicely with legacy and modern equipment alike.

- Ideal for advanced industrial automation, machine vision, and edge computing, this PC handles complex tasks with speed and precision.
- It delivers the processing punch you need for real-time data analysis, predictive maintenance, and seamless control — all in one compact, reliable unit.
- Pre-installed with Windows 11 Professional, it's ready to drop into your operation from the moment it arrives.

Proudly 100% designed in India, the IPC5 combines proven international components with thoughtful engineering. The smooth, dark grey anodised finish isn't just for looks — it resists corrosion and adds a professional touch to any control panel.

When downtime is not an option and performance is non-negotiable, the Thinvent IPC5 is the quiet, rugged workhorse your operation can depend on. Choose it as a direct alternative to older, bulkier industrial PCs, and give your team the edge it deserves.
