Powerhouse performance, built to outlast the factory floor.

Introducing the Thinvent® IPC5: the industrial PC that brings desktop-class speed to the harshest environments, engineered entirely in India and refined for relentless operation. This is not just another box in the rack – it is the quiet brain your automation line has been waiting for.

Uncompromising performance

Think ten cores of raw Intel® Core™ i5 processing power, ready to crunch through complex machine vision algorithms, control robotic arms, or stream real-time edge analytics – all without breaking a sweat. When every millisecond matters, the IPC5 responds with the speed and precision your operations demand.

Built for the real world

No fans, no spinning parts, no weak points. The fanless, sealed aluminium housing with a smooth anodised grey finish shrugs off dust, grime, and vibration. It operates reliably in temperatures from freezing to 50°C, so you can mount it anywhere – from a dusty packing line to a sweltering control cabinet – and forget about it.

Connectivity that covers every base

With a generous spread of USB ports, dual serial RS232 ports, dual display outputs, and gigabit Ethernet, the IPC5 connects to legacy machinery and modern sensors alike. You get all the flexibility you need for a truly advanced industrial setup – no extra adapters, no fuss.

A smarter long-term investment

Windows 11 Professional comes pre-installed, so it works straight out of the box. The rugged build, energy-efficient design, and 24/7 reliability mean lower downtime and fewer replacements. When you choose Thinvent, you're backing a product designed and engineered in India – for the world's toughest jobs.

Upgrade your edge. Run with the IPC5.
