Meet the workhorse that never sweats: Thinvent® Industrial PC IPC5.

Built for the factory floor, the control room, and the edge of tomorrow, the IPC5 is the silent powerhouse your operations have been waiting for. It combines the intelligence of a 13th-generation Intel® Core™ i5 processor with the kind of rugged reliability that keeps production lines moving, shift after shift, without a single hiccup.

Why choose the IPC5?

- It thrives where others falter: the fanless, passive-cooled aluminium chassis shrugs off dust, heat, and vibration, so you can mount it in the toughest corners of your plant and forget it's there.
- It responds at the speed of thought: with ten cores reaching up to 4.6 GHz, this machine chews through machine-vision algorithms, real-time control logic, and edge analytics without breaking a sweat.

- It connects to everything that matters: from legacy serial instruments to modern gigabit networks and dual-band Wi-Fi, you'll have every port and wireless option you need to tie your entire operation together.
- It is ready to run from day one: pre-loaded with Windows 11 Professional, you can deploy it, integrate it, and secure it with the tools your IT team already knows.
- It is proudly designed in India: 100% conceived and engineered in-house, the smooth anodised grey finish looks professional in any setting, from a gleaming showroom to a rugged automation cell.

Whether you are upgrading an existing line, building a smart factory, or pushing compute to the edge, the IPC5 gives you dependable power, serious connectivity, and absolute peace of mind. It is not just another industrial PC; it is the quiet backbone your business can build on.
