Your shop floor just got a smarter front desk.

The Thinvent® 15" Industrial Panel PC is built for the places where ordinary computers give up. Factories, warehouses, kitchens, workshops and control rooms all ask the same thing of a machine: keep working. This panel PC answers.

Why it belongs on your wall, bench or production line

- A bright 15 inch display with wide viewing angles stays readable from almost anywhere in the room, so operators see what they need without crowding the screen.
- Fanless passive cooling in an aluminium housing means no vents pulling in dust and no fan to wear out, making it a natural fit for busy, messy environments.

- The Intel® processor, 4GB of memory and 128GB SSD keep everyday industrial software, dashboards and terminals responsive.
- Four USB 3.0 ports, HDMI, VGA, audio and Gigabit Ethernet let you connect scanners, printers, cameras and legacy equipment without adapters.
- Dual band Wi-Fi keeps the unit linked to your network where cabling is impractical.
- Comes with a Thinvent® keyboard and mouse set, so you can deploy it straight out of the box.

If you need a dependable touchpoint for staff, machinery or customers, this is the panel PC to specify.
