Big screen control, built to stay on the line.

The Thinvent 15" Industrial Panel PC brings a clear, wide view to the place where work actually happens. Whether it sits on a production floor, at a service counter, or in a control room, it gives your team one dependable screen for the task at hand.

Why it earns its place

- A 15 inch display with a 178 degree viewing angle means readings stay clear from almost anywhere on the floor, so operators do not have to stand directly in front of it.
- The Intel processor N5095A with four cores keeps everyday industrial software, dashboards, and data entry moving without fuss.
- Windows 11 Pro comes ready, so you can run the business applications your operation already depends on.

- Dual band Wi-Fi 5 and Gigabit Ethernet keep the panel connected to your network and your data.
- Four USB 3.0 ports, HDMI, and VGA make it simple to attach scanners, printers, cameras, or a second screen.
- Fanless passive cooling and an aluminium housing suit busy environments where you want fewer moving parts and less to maintain.
- A 12 volt adapter with a 2 metre cable gives you flexible placement on the shop floor or at a workstation.

Choose the Thinvent 15" Industrial Panel PC when you need a large, readable interface that fits into real industrial work and keeps your team productive shift after shift.
