Your dependable workstation for the factory floor.

Meet the Thinvent® 15" Industrial Panel PC, built for the realities of industrial environments. It pairs a responsive Intel® processor with Ubuntu Linux 24.04 LTS, giving you a stable, secure, and familiar platform from day one.

Where it belongs

- Production lines and shop floors where a reliable terminal keeps operators informed and processes moving.
- Kiosks and self-service points that need a clear, bright display and a responsive touchpoint for customers.
- Control rooms and monitoring stations where staff need a single, uncluttered screen to track operations.
- Laboratories and workshops where a dedicated, network-connected machine handles data capture and reporting.

Why it earns its place

- Ubuntu Linux 24.04 LTS means long-term security updates and a predictable operating system you can standardise across your fleet.
- The 15" screen with 350 nits brightness and 178° viewing angles stays readable from almost any position, so operators can glance and go.
- Fanless passive cooling and an aluminium housing keep the unit running quietly and reliably, with fewer moving parts to service.
- Four USB 3.0 ports, Gigabit Ethernet, HDMI and VGA give you room to connect the peripherals and displays your workflow demands.
- A bundled Thinvent® keyboard and mouse set means the system is ready to use straight out of the box.

The Thinvent® 15" Industrial Panel PC is the practical choice for teams who need a dependable, low-maintenance terminal that simply gets on with the job.
