A clear view of your operation, built to stay put.

Meet the Thinvent 15" Industrial Panel PC, a dependable all in one computer for the shop floor, the control room, or the kiosk that never gets a day off.

Why teams choose it

- The 15 inch screen with 350 nits of brightness stays readable under factory lighting, and the 178 degree viewing angles mean the reading stays clear from wherever your operator stands.
- Powered by an Intel processor with four cores, it handles dashboards, machine interfaces, and point of sale software without hesitation.
- Fanless passive cooling inside an aluminium housing means fewer moving parts to wear out, so it keeps working through dust and heat.
- Dual band Wi-Fi 5 and 1000 Mbps Ethernet keep your data moving across the network.

- Four USB 3.0 ports, HDMI, and VGA make it easy to connect scanners, cameras, and extra displays.
- Comes without an operating system, so you install exactly the software your process needs, with nothing you do not want.

Where it fits

- Production line terminals and machine control panels
- Warehouse and logistics stations
- Retail point of sale and self service kiosks
- Building management and access control desks

If you need a panel computer that turns on, shows your work, and quietly keeps going shift after shift, this is the one to specify.
