Big screen. Small footprint. Zero fuss.

The Thinvent 15" Industrial Panel PC brings a bright, easy to read display and dependable Intel performance to the places where ordinary computers struggle. With an Intel Celeron N5095A processor, 4 GB of DDR4 memory and a 128 GB SSD, it handles the everyday workloads that keep a business moving.

Where it earns its keep

- Shop floors and production lines, where a clear 15 inch screen keeps operators informed at a glance
- Kiosks, information points and reception desks that need to run all day, every day
- Warehouses and back offices, where a tidy all in one panel replaces a bulky tower and monitor
- Control rooms and monitoring stations, where reliable wired networking matters more than wireless

Why buy it

- The wide 178 degree viewing angle means the screen stays readable from almost any position, so staff never have to crowd around it
- Fanless passive cooling and an aluminium housing mean fewer moving parts and less to go wrong
- Windows 11 Pro comes ready to deploy with your own line of business software
- Four USB 3.0 ports, HDMI, VGA and Gigabit Ethernet cover the connections industrial setups actually use
- A single 15 inch panel saves desk space and simplifies installation compared with a separate PC and display

If you need a dependable, uncomplicated panel computer that simply gets on with the job, this is it.
