Big screen control, built for the factory floor.

Meet the Thinvent 15" Industrial Panel PC, a dependable all-in-one touchpoint for the places where ordinary computers simply cannot keep up.

Why you should choose it

- One tidy unit replaces a separate monitor and desktop, so your workstation stays clean and your operators stay focused.
- The 15 inch display with wide viewing angles means readings stay clear whether you are standing directly in front of it or glancing from the side of the line.
- Powered by an Intel processor with four cores, it handles dashboards, machine interfaces and data logging without hesitation.
- Fanless passive cooling and an aluminium housing mean fewer moving parts to wear out, so there is less to maintain and less to go wrong.

- Dual band Wi-Fi and gigabit Ethernet keep your shop floor systems connected to the rest of your operation.
- Four USB 3.0 ports, HDMI and VGA make it easy to add scanners, printers, cameras or a second screen.
- Windows 11 IoT Enterprise LTSC gives you a long-life platform built for dedicated equipment rather than office desks.

Where it earns its keep

- Production line terminals and machine control stations.
- Warehouse and logistics dashboards.
- Kiosks, check-in points and self-service stations.
- Building management and monitoring rooms.
- Laboratory and testing benches.

If you need a screen that lives where the work happens and keeps running shift after shift, this is the panel PC to put on the wall.
