Big performance for the factory floor.

The Thinvent 15" Industrial Panel PC brings desktop-class speed to demanding shop-floor and control-room environments. Powered by an Intel Core i3-1215U processor, it responds quickly to operator input and keeps applications moving smoothly, even when several tasks run at once.

Where it earns its keep

- Machine control and HMI panels on production lines
- Production dashboards and live monitoring stations
- Interactive kiosks and self-service terminals
- Warehouse and logistics workstations
- Laboratory and test-bench instrumentation

Why teams choose it

- The 15" display with wide viewing angles stays readable from different positions on the floor, so operators see what they need without crowding the screen
- Fanless passive cooling and an aluminium housing mean fewer moving parts to service and dependable operation in dusty, hot surroundings
- Flexible connectivity, including RS485, Ethernet, HDMI, VGA and multiple USB ports, lets you connect PLCs, sensors, scanners and peripherals without extra adapters
- A range of processor, memory and storage configurations is available, so you can match the unit to your workload rather than overpaying for capacity you will not use

Build your next control station around a panel PC that is ready for long shifts and tough conditions. Configure yours with the options that suit your line, and keep production moving.
