Big performance for the factory floor.

Why the Thinvent 15" Industrial Panel PC belongs on your line

- The 12th generation Intel Core i3-1215U processor with six cores and speeds up to 4.4 GHz keeps your production dashboards, machine interfaces and shop floor terminals responsive all shift long.
 - A 15 inch panel with 350 nits of brightness and wide viewing angles stays readable across the workstation, so operators can check status at a glance without leaning in.
 - Fanless passive cooling in an aluminium housing means fewer moving parts to wear out, making it a natural fit for dusty workshops, food processing areas and other environments where reliability matters.
 - Essential industrial connectivity is built in, including RS485, dual Ethernet at 1000 Mbps and a mix of USB ports, so you can link PLCs, sensors, scales and legacy equipment without extra adapters.
 - The 4 GB memory and 128 GB SSD combination gives you a dependable, low maintenance platform for kiosks, HMI replacement, production tracking and access control desks.
 - Choose your own operating system and configure the machine to match your existing software stack, rather than rebuilding around a locked down platform.
- If you need a panel PC that turns up, boots up and keeps your operation visible, this is the one to specify.
