A clear view of your operation, built to keep working.

The Thinvent 15" Industrial Panel PC brings your shop floor, control room, or service counter a dependable all-in-one workstation. With a 12th generation Intel Core i3 processor at its heart, everyday industrial software feels responsive rather than sluggish, so your team spends time on the job instead of waiting on the screen.

Why it belongs on your bench

- One screen does it all. The panel format means the computer lives where the work happens, cutting clutter and cabling around your station.
- Readable from every angle. The 15 inch display stays clear whether you are standing directly in front or stepping to the side, which matters when several people share a terminal.

- Connect what you already own. Legacy serial equipment, monitors, and modern peripherals all have a home here, so you are not forced into an expensive overhaul of your existing setup.
- Quiet, sealed aluminium housing. Passive cooling keeps dust out of the works and noise out of the room, ideal for workshops and production areas.
- Ready on arrival. Windows 11 Pro, wireless networking, and a keyboard and mouse set are included, so commissioning is quick.

If you need a reliable alternative to aging panel computers that are becoming harder to support, this is a sensible, modern replacement that fits straight into your workflow.

Choose Thinvent and give your operation a screen that simply keeps up.
