Power your shop floor with a panel PC that simply keeps running.

The Thinvent® 15" Industrial Panel PC is built for the places where ordinary computers give up. Dusty workshops, hot production halls and busy counters are exactly where it feels at home, thanks to a fanless aluminium design that shrugs off grime and heat.

Why it belongs on your line

- It starts fast and stays responsive all shift, so your team never waits on a sluggish terminal.
- The bright 15" screen stays clear from almost any angle, making it easy to read on a bench, a machine or a service counter.
- Thinux™ Embedded Linux keeps things locked down and predictable, so there are fewer surprises and less downtime.

- Browsers, remote desktop, SSH and VNC come ready, so you can manage and shadow the unit from wherever you are.
- LibreOffice, PDF viewing and multimedia playback mean it handles real work, not just one task.
- Java, Python and glibc support let you run your own location applications without a fight.
- SIP video and voice keep your team connected right at the workstation.

If you need a dependable panel PC for production, retail, logistics or control rooms, this is the one to buy. It is quiet, solid and ready to work as hard as you do.
