Tough, fast and built for the factory floor.

The Thinvent® 15" Industrial Panel PC is the dependable centre of your production line, control room or kiosk. Powered by a 12th generation Intel® Core™ i3-1215U processor, it responds instantly to every touch, keeps dashboards smooth and handles demanding plant software without stutter.

Why teams choose it

- Runs all day on the shop floor, thanks to fanless passive cooling and a rugged aluminium housing that shrugs off dust and heat.
- Two Gigabit Ethernet ports keep your control network and office network separate, so plant traffic never slows your reporting.
- Thinux™ Embedded Linux comes ready to work, with Chromium, Firefox, LibreOffice, PDF viewing, multimedia playback and SIP video and voice over IP.
- Remote display, VNC shadowing and browser based management let your IT team support every unit from their desk.

- Java, Python and glibc support means your existing location applications run without a rewrite.
- A clear 15 inch display with wide viewing angles stays readable from across the workstation.
- The included Thinvent® keyboard and mouse mean you can deploy straight out of the box.

Where it fits

- Production line terminals and machine control stations.
- Warehouse and logistics dashboards.
- Interactive kiosks and information points.
- Laboratory and test bench instrumentation.
- Remote monitoring and control rooms.

If you need an industrial panel PC that simply keeps running, shift after shift, the Thinvent® 15" is the sensible choice.
