Your shop floor just got a serious upgrade.

Meet the Thinvent® 15" Industrial Panel PC, built around the Intel® Core™ i3-1215U processor. With six cores running up to 4.4 GHz, it handles point-of-sale software, machine monitoring dashboards and inventory systems without stuttering or slowdowns. The 15 inch display gives your team a clear, comfortable view from almost any angle, so operators can read what matters at a glance.

Why it belongs on your floor

- Dual gigabit Ethernet ports let you connect to both your office network and a dedicated machine network, keeping production data separate from admin traffic.
- An RS485 option connects directly to industrial equipment, meters and controllers, so you can bring legacy machines into your modern workflow.

- Fanless passive cooling in an aluminium housing means fewer moving parts to fail in dusty, hot or busy environments.
- Windows 11 Professional comes ready to run your business applications from day one, with a keyboard and mouse set included.
- Wi-Fi 5 dual band keeps handheld scanners, tablets and management tools connected without extra cabling.

Whether you run a production line, a warehouse desk or a retail counter, this panel PC is designed to stay where the work happens. It boots quickly, responds instantly and keeps your operation moving shift after shift.

Upgrade to a machine that works as hard as your team does.
