A 15 inch industrial panel PC built to keep your line running.

When your operation needs a dependable touchpoint on the factory floor, at the kiosk, or on the shop counter, this is the machine that simply gets on with the job. The 12th generation Intel Core i3-1215U processor with six cores and speeds up to 4.4 GHz keeps everyday industrial software, dashboards and control interfaces responsive, so your team is never left waiting.

Why it earns its place

- Dual gigabit Ethernet ports let you keep control traffic and office traffic on separate networks, which simplifies how you wire up a machine or a workstation.
- The 15 inch panel with 1024 x 768 resolution and 350 nits brightness stays readable across a wide 178 degree viewing angle, so operators can see clearly from wherever they stand.

- Fanless passive cooling in an aluminium housing means fewer moving parts to service and one less thing to worry about in a busy environment.
- An RS485 option lets you talk to the older industrial equipment you already have on site, protecting your existing investment.
- Two USB 3.2 ports, HDMI and VGA give you room to connect scanners, displays and peripherals without extra adapters.
- Ships without an operating system, so you can install exactly the platform your application requires.

If you want a panel PC that fits into your process rather than fighting it, this is the one to specify.
