Your shop floor deserves a screen that keeps up.

The Thinvent 15" Industrial Panel PC brings serious computing power to the places where ordinary computers struggle. At its heart sits an Intel Core i3-1215U processor with six cores and speeds up to 4.4 GHz, so demanding applications open quickly and keep responding, shift after shift.

Who is this built for

- Production managers who need live dashboards right at the line, not in a distant office.
- System integrators building control panels, kiosks and machine interfaces that must simply work.
- Factory and warehouse teams running inventory, labelling or monitoring software in real time.
- Anyone replacing an ageing panel PC who wants modern performance with Windows 11 Professional ready to go.

Why it earns its place

- Dual Gigabit Ethernet ports let you connect to both your machine network and your plant network at the same time.
- The 15 inch display with 178 degree viewing angles stays clear from almost any position, and 350 nits of brightness holds up under bright factory lighting.
- Fanless passive cooling in an aluminium housing means no dust-choked fans to fail, so it keeps running in dusty, hot environments.
- With 4 GB DDR4 RAM and a 128 GB SSD, it boots fast and handles everyday industrial software without fuss.
- RS485, HDMI, VGA, USB 3.2 and audio connections cover the peripherals your installation already uses.
- Dual band Wi-Fi 5 keeps wireless links to your MES or cloud systems stable.

If you need a dependable panel PC that pairs modern Intel performance with a rugged, fanless design, this is the one to specify.
