Big performance, small footprint.

The Thinvent® 15" Industrial Panel PC brings serious computing power to the shop floor, the kiosk, and the control room. With a 13th generation Intel® Core™ i3-1315U processor and six cores ready to respond in an instant, it keeps your dashboards, terminals, and production software moving without stutter or delay.

Why choose this panel PC

- Run modern industrial software smoothly, from SCADA displays to point-of-sale and machine interfaces, thanks to a processor built for responsive everyday workloads.
- See clearly from almost any position. The 15 inch screen with wide viewing angles keeps readings, charts, and controls legible for operators standing to the side or below.

- Install it where other computers struggle. Fanless passive cooling and an aluminium housing mean no vents to clog and no fans to wear out, so it keeps working in dusty, hot, or cramped spaces.
- Connect to what you already have. HDMI, VGA, USB, audio, and Gigabit Ethernet cover monitors, peripherals, and plant networks, while dual band WiFi keeps wireless links flexible.
- Start up with confidence. Windows 11 IoT Enterprise LTSC 2024 Value gives you a stable, long-life platform that stays consistent over the years your equipment is in service.
- Save space and simplify. One panel-mounted unit replaces a separate box, monitor, and cabling tangle, cutting installation time and clutter.

If you need a dependable industrial computer that fits your line, your budget, and your working conditions, this is the one to specify.
