Big performance for the shop floor, in a panel that fits right in.

Thinvent's 15 inch Industrial Panel PC brings 13th generation Intel Core i3 muscle to the places where ordinary computers struggle. With six cores and speeds up to 4.5 GHz, it stays quick and responsive while running the line, the till, or the terminal.

Where it earns its keep

- Production and assembly stations that need a reliable screen and fast processing shift after shift.
- Warehouse and logistics desks running inventory, scanning, and dispatch software without stutter.
- Kiosks, control rooms, and information points where a clear 15 inch display matters.
- Machine and equipment control, thanks to a fanless aluminium design that copes with dusty, hot environments.

Why buy it

- Powered by Intel Core i3-1315U, so everyday industrial software feels smooth, not sluggish.

- Windows 11 Professional comes ready to deploy with your existing business applications.
- 128 GB SSD and 4 GB DDR4 memory give you responsive everyday performance.
- A wide 178 degree viewing angle means the screen stays readable from almost anywhere on the floor.
- 350 nits of brightness keeps things visible in bright working areas.
- Gigabit Ethernet plus USB, HDMI, and VGA connections slot neatly into existing setups.
- Fanless passive cooling and an aluminium housing mean fewer moving parts to fail and less maintenance to worry about.
- Wide 100 to 240 volt AC input handles varying mains supplies without extra kit.

If you need a dependable, quick panel computer that simply gets on with the job, this is it.
