The panel PC that keeps your production line moving.

Your operators need a screen they can trust shift after shift. The Thinvent 15" Industrial Panel PC puts a responsive Intel Core i3-1315U processor right where the work happens, so your team spends time getting things done rather than waiting on a sluggish terminal.

Built for the realities of the factory floor

- A 15 inch display with 178 degree viewing angles keeps readings clear from almost any position, so operators can check status at a glance without leaning in.
- Ubuntu Linux 24.04 LTS means a stable, familiar platform that integrates smoothly with your existing systems and resists the clutter that slows machines down over time.
- Fanless passive cooling inside an aluminium housing means fewer moving parts to wear out and less downtime spent on maintenance.

- Gigabit Ethernet keeps your machine data flowing reliably to your control systems, while HDMI, VGA, USB and audio ports connect the peripherals you already use.
- A 12V 5A adapter with a 2 metre cable gives you flexibility in where you position the unit on your line.

Who it is for

- Factory and workshop teams running machine control or monitoring stations.
- System integrators building kiosks and industrial HMI setups.
- Businesses that need a dependable fixed-position terminal without consumer-grade fragility.

If you want a display that simply works, day in and day out, this is the one to specify.
