Big screen performance for the factory floor.

Your team deserves a terminal that keeps pace with them, not one that holds them back. The Thinvent® 15" Industrial Panel PC brings a 13th generation Intel® Core™ i3 processor to the workstation, so spreadsheets, dashboards, and plant applications open quickly and respond the moment they are touched.

Built for where work actually happens

- Production and assembly stations where operators need a large, clear display for instructions, quality checks, and reporting
- Warehouse and logistics desks running inventory, dispatch, and browser based management tools
- Control rooms and machine side stations using remote display, VNC shadowing, and SSH to manage equipment across the site
- Front of house and back office points of sale, kiosks, and information screens

- Training rooms and shared workstations where LibreOffice, PDF viewing, and multimedia playback are part of the daily routine

Why teams choose it

- The 15 inch panel with wide viewing angles stays readable from different positions on the line, so operators are not crowding the screen
- Aluminium housing and passive cooling mean fewer moving parts to service and less downtime to plan around
- Thinux™ Embedded Linux arrives ready to work, with Chromium, Firefox, Java, Python, and SIP voice and video support built in
- Dual band WiFi and gigabit Ethernet keep the terminal connected to your network and your applications
- Keyboard and mouse are included, so the station is ready from the moment it is unboxed

If you want a dependable panel PC that feels fast today and stays useful tomorrow, this is the one to specify.
