Big performance for the shop floor, in a panel that fits right in.

The 15 inch Industrial Panel PC from Thinvent brings serious computing power to environments where ordinary computers struggle. Powered by a 13th generation Intel Core i3 processor, it responds quickly to whatever your operators throw at it, from production dashboards to point of sale to machine control.

Why it belongs on your line

- Fast, responsive performance. Six cores and speeds up to 4.5 GHz keep demanding applications running smoothly, so your team is never waiting on the screen.
- Built for the real world. A fanless passive design and aluminium housing mean fewer moving parts to fail and less downtime to worry about.

- Clear from every angle. The 15 inch display with wide viewing angles stays readable whether you are standing directly in front of it or off to the side.
- Ready to connect. Dual band WiFi and gigabit Ethernet keep your panel linked to the rest of your operation, while USB, HDMI and VGA ports make integration straightforward.
- Software you can rely on. Ubuntu Linux 24.04 LTS delivers a stable, secure platform that is easy to manage across a fleet of machines.

If you need a dependable panel PC that keeps production moving shift after shift, the Thinvent 15 inch Industrial Panel PC is the practical choice.
