Your shop floor deserves a computer that keeps up.

The Thinvent 15" Industrial Panel PC brings serious computing power to the places where ordinary desktops struggle. Powered by a 13th generation Intel Core i5 processor with ten cores running up to 4.6 GHz, it handles demanding point of sale, machine control and production monitoring software without hesitation.

Why businesses choose it

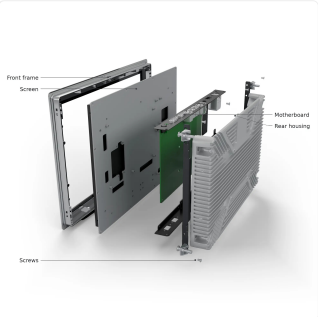

- Built for the factory floor, not the office desk. The aluminium housing and fanless passive cooling mean no vents to clog with dust and no fans to fail, so it keeps running shift after shift.
- A 15 inch screen with 350 nits brightness and 178 degree viewing angles stays readable from almost any position, whether mounted at a workstation or on production equipment.
- Ubuntu Linux 24.04 LTS comes ready to run, giving you a stable, secure platform for kiosks, digital signage and industrial applications.
- Dual band Wi-Fi 5 and Gigabit Ethernet keep your systems connected to your network and your data flowing.
- Plenty of connectivity for real world setups, including HDMI, VGA, four USB ports, speaker out and mic in, so scanners, printers, cameras and audio all connect without adapters.
- The included Thinvent keyboard and mouse set means you are up and running the moment you unbox.

  If you need a reliable panel PC that handles heat, dust and continuous operation while running the software your business depends on, this is the machine for the job.
