Big performance for the factory floor.

The Thinvent 15" Industrial Panel PC brings desktop-class speed to demanding shop floor, kiosk and control room environments. With a 13th generation Intel Core i5 processor, it responds instantly to everything your operators throw at it, from live dashboards and machine monitoring to point-of-sale and production tracking.

Why choose this panel PC

- Built to keep working. The fanless aluminium housing has no moving parts to clog with dust, so it stays reliable in hot, gritty and cramped spaces where ordinary PCs struggle.
- One screen, many jobs. Run your HMI, your reporting tools and your business software side by side without slowdown.

- Easy to read, easy to reach. The wide viewing angles and bright 15 inch display stay clear from almost any position on the line, so operators see what they need at a glance.
- Fits straight into your setup. Connect legacy equipment over VGA and HDMI, add peripherals through four USB ports, and link to your plant network over Gigabit Ethernet or dual band WiFi.
- Ready to deploy. Windows 11 Pro comes preinstalled, so your software and security tools are up and running on day one.

Whether you are upgrading an ageing terminal on the production line or fitting out a new control station, this panel PC gives you the speed, connectivity and rugged construction your operation depends on.
