Big performance, small footprint, built to run all day.

The Thinvent® 15" Industrial Panel PC brings serious computing power to the shop floor, the control room, or the kiosk. With a 13th generation Intel® Core™ i5-1335U processor, it handles demanding applications without hesitation, so your team spends time getting work done rather than waiting on a screen.

Where it earns its keep

- Production lines and machine control, where a clear 15 inch display and wide viewing angles keep operators informed from any position.
- Interactive kiosks and self-service terminals that need to stay responsive through long shifts.
- Control rooms and monitoring stations running dashboards, RDP sessions, or browser based management.
- Thin client and virtual desktop deployments, with RDP 10, VNC shadowing, and SSH built in.

- Voice and video over IP for intercom and communication points.
- Locations where a wired Ethernet connection is the reliable choice.

Why buy it

- The aluminium housing and fanless passive cooling mean fewer moving parts to wear out, so the unit keeps working in dusty, hot environments.
- Thinux™ Embedded Linux comes ready to use, with browsers, remote management tools, LibreOffice, and support for Java, Python, and location based applications.
- Dual USB 3.2 and USB 2.0 ports, HDMI, and VGA give you room to connect the peripherals you already own.
- A 1000 Mbps Ethernet port keeps your data moving on the factory network.

If you need a dependable panel PC that starts fast, stays cool, and runs the software your operation depends on, this is the one to put on your shortlist.
