Your shop floor deserves a screen that keeps up.

The Thinvent® 15" Industrial Panel PC brings serious computing power to demanding workplaces. With a 13th generation Intel® Core™ i5 processor and ten cores running up to 4.6 GHz, it handles point of sale software, machine monitoring dashboards, inventory systems and production tracking without stuttering or delay.

Why businesses choose it

- Built for the workday. The aluminium housing and fanless passive cooling design mean fewer moving parts and one less thing to maintain, so your team spends time on the job rather than on repairs.
- Clear, comfortable viewing. The 15 inch display with 350 nits brightness and wide 178° viewing angles stays readable from different positions on the floor, whether mounted at a counter or beside a machine.

- Ready to connect. Gigabit Ethernet, HDMI, VGA, USB 3.2 and USB 2.0 ports, plus speaker out and mic in, let you link scanners, printers, displays and audio without extra adapters.
- Windows 11 Pro out of the box. Sign in, install your line of business applications and start working the same day.
- Complete package. A Thinvent® keyboard and mouse set is included, along with a 12V 5A adapter and a 2 metre cable.

If you need a dependable panel PC that pairs real processing power with a rugged, low maintenance design, this is the one to put on your shortlist.
