Speed and clarity for the factory floor, in one slim panel.

Built for the realities of industrial work, this 15 inch panel PC pairs a responsive Intel Core 5 120U processor with a bright, wide viewing display. It is made for teams who need a dependable screen at the point of work, not a fragile office machine.

Where it earns its place

- Production and assembly stations where operators need clear, glanceable information without turning away from the line
- Machine control and monitoring panels that run through long shifts
- Warehouse and logistics desks tracking goods in real time
- Kiosk and self-service points in busy, dusty environments
- Laboratory and testing benches where a stable, dedicated screen beats a shared laptop

- The 15 inch display with 178 degree viewing angles stays readable from almost any position, so operators do not have to stand directly in front of it
- Fast processing keeps dashboards, control software and data entry responsive, even with several tasks open
- Fanless passive cooling and an aluminium housing mean fewer moving parts to fail and less dust drawn inside
- No WiFi and no pre-installed operating system give you a clean slate, so you can load your own software and control exactly how the machine connects
- Dual HDMI, VGA, four USB ports and gigabit Ethernet make it straightforward to fit into existing setups

If you need a dedicated industrial display and computer in one, this panel PC is ready to become part of your operation.
