Big performance for the factory floor, the front desk and everywhere in between.

The Thinvent 15" Industrial Panel PC brings 14th generation Intel Core 5 power to the places where ordinary computers give up. With ten cores ready to respond in an instant, it keeps your production line, kiosk or control station moving without stutter or delay.

Why it earns its place on your bench

- Built for the real world. The aluminium housing shrugs off dust, heat and the bumps of daily industrial life, so your screen stays on shift after shift.
- See it from anywhere. The 15 inch display holds its clarity at wide angles, so operators, supervisors and customers all get a clean view without crowding the panel.

- Connect everything you run. Dual HDMI, VGA, four USB ports and gigabit Ethernet mean your existing printers, scanners, cameras and legacy equipment simply plug in and work.
- Quiet, clean and low maintenance. Passive cooling means no fans to clog, no filters to change and no noise to drown out conversation on the shop floor.
- Ready for your network. Dual band Wi-Fi keeps your panel talking to the systems that matter.
- Set up in minutes. Comes with a Thinvent keyboard and mouse set, so you are up and running the moment it leaves the box.

If you need a dependable industrial terminal that handles today's workloads and tomorrow's, this is the one to specify.
