Speed and clarity for the factory floor.

The Thinvent 15" Industrial Panel PC brings desktop-class responsiveness to shop floors, kiosks and control rooms. Powered by a 14th generation Intel Core 5 120U processor with 10 cores reaching up to 5 GHz, it handles demanding dashboards, monitoring software and multi-window workflows without hesitation.

Why choose this panel PC

- Reliable performance where it matters. The Intel Core 5 120U keeps production dashboards, SCADA screens and data-logging tools running smoothly shift after shift.
- A screen built for the working day. The 15 inch display with 350 nits brightness and 178 degree viewing angles stays readable from almost any position, so operators can check status at a glance.

- Flexible connectivity for real installations. Dual HDMI, VGA, four USB ports, gigabit Ethernet and dual band Wi-Fi 5 make it easy to connect scanners, cameras, PLCs and legacy equipment.
- Simple to deploy. The included keyboard and mouse set means you can set up a workstation straight out of the box, and the 12V adapter with a 2 metre cable fits neatly into control cabinets and kiosks.
- Built for industrial environments. The aluminium housing and fanless passive cooling design keep the unit running in dusty, hot or cramped spaces where ordinary PCs struggle.

Whether you are upgrading an existing line or building a new control station, this panel PC delivers the speed, clarity and connectivity your operation needs.
