Big screen. Serious speed. Zero fuss.

The Thinvent® 15" Industrial Panel PC brings desktop-class performance to the shop floor, the control room, and the front desk. With an Intel® Core™ 5 120U processor and 10 cores ready to respond, it keeps up with demanding industrial software, live dashboards, and point-of-sale systems without hesitation.

Why you should choose it

- See more, scroll less. The 15 inch display and wide viewing angles keep every reading clear, whether you are standing right at the panel or glancing from across the aisle.
- Built for the real world. The aluminium housing and fanless passive cooling mean no vents to clog and no fans to fail, so it keeps running in dusty workshops, hot production lines, and busy service counters.

- Ready the moment it arrives. Windows 11 Professional comes preinstalled, and the included keyboard and mouse set means you can unbox, plug in, and get to work.
- Connect everything you already own. Dual band WiFi, gigabit Ethernet, HDMI, VGA, and multiple USB ports let you link barcode scanners, printers, cameras, and legacy equipment without adapters.
- Flexible power for any site. The adapter accepts a wide AC input range, so it travels happily between locations and power conditions.

If you need a dependable panel PC that handles heavy workloads on a bright, generous screen, this is the one to buy.
